SUMMARY

Self-driven developer with a strong foundation in iOS, Flutter, and Game Development. Experienced in full-cycle project management from concept to completion, with a focus on building scalable mobile applications and immersive 3D environments. Passionate about leveraging modern frameworks like SwiftUI and Unity to solve complex problems and deliver intuitive user experiences.

PROJECT

LOLFinder: League of Legends Profile Search App (Flutter)

- Developed a cross-platform mobile application using Flutter and Dart to query and display real-time player statistics
- Integrated Riot Games API for asynchronous data fetching and handled complex JSON responses for profile visualization
- Designed an intuitive UI allowing seamless navigation and input for summoner data
- Implemented state management to ensure a smooth and responsive user experience across various screens

Pomodoro: Study Timer (iOS/SwiftUI)

- Built a productivity-focused iOS application using SwiftUI to help users manage focus and break sessions
- Developed precise timer logic and managed the application life cycle to ensure persistent performance in the background
- Integrated local notifications to alert users upon session completion, improving user engagement and utility

Survive and Find Star: 3D FPS Game (Unity)

- Developed an action-oriented 3D game using Unity and C#, focusing on character movement and combat mechanics
- Engineered enemy AI behaviors and implemented core gameplay loops
- Refined gameplay balance through iterative testing and performance optimization

EXPERIENCE

Server

Pelicana Chicken Atlanta & Chou's Kitchen

October 2023 - current, Atlanta, GA & LaGrange, GA

- Collaborated effectively within fast-paced team environments to deliver high-quality customer service
- Demonstrated strong multi-tasking and problem-solving skills under strict time constraints

EDUCATION

BACHELOR in Game Development

Georgia State University • 2021 current

- Honors: Dean's List (FALL 2024)
- Involvement: GSU PantherDev (Student Game Development Organization)

SKILLS

Technical Skills

Languages: Swift, Dart, C#, HTML, CSS, JavaScript

Frameworks: SwiftUI, Flutter, Unity

Architecture & Concepts: MVVM, REST API Integration, App Life Cycle Management

Tools: Visual Studio Code, XCode, Android Studio, GitHub

Languages

Korean (Native), English (Fluent), Japanese (Conversational)

Soft Skills

Team Collaboration, Problem Solving, Ownership, Concept & Design
