

Created basic main menu widget with three buttons in vertical box

- Scrolling down the details section, there will be 'On Clicked Event' for each button. I just had to connect these to 'Open Scene'

Then, I could add the background photo for the widget!

- The background photo was generated by Gemini, using a few screenshots of the project.

When I kept playing on the editor, it kept asking about 'Lighting needs to be rebuilt'.

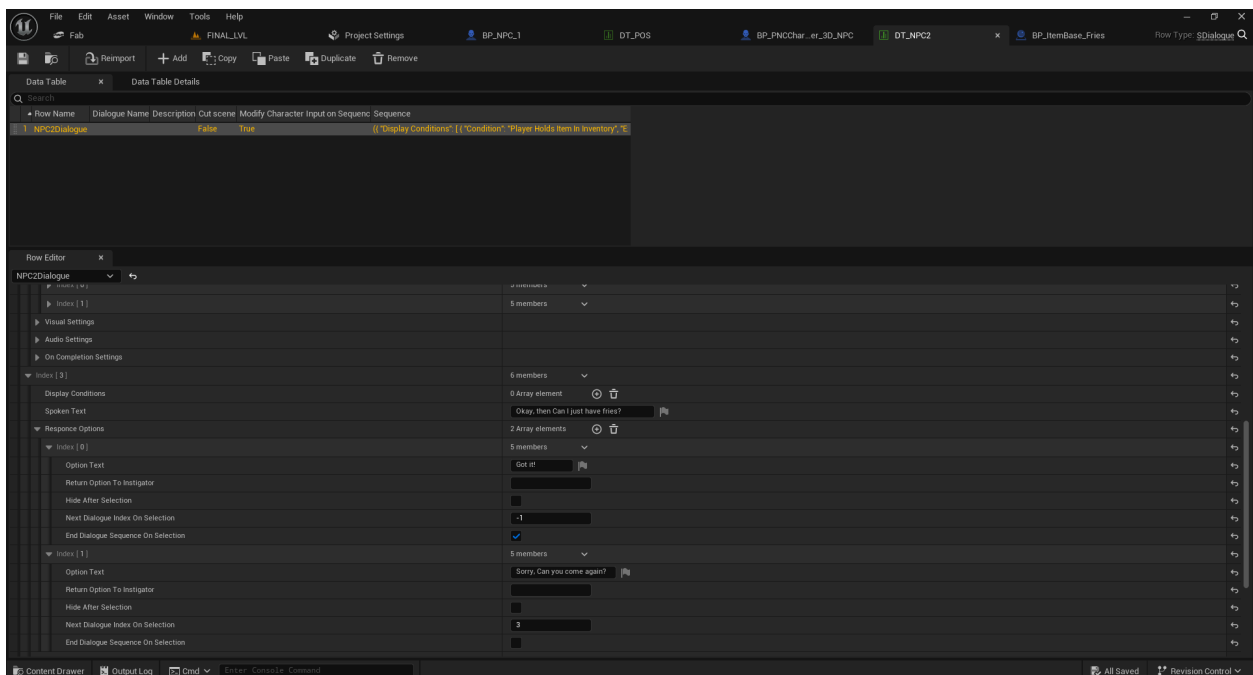

- Build -> Build Only Lights was the solution for it.

One more NPC is imported!

- Animations are re-targeted for these
- Animation mode > Use Animation Asset > 'Idle_Seated_Anim'

This data table is for lady customers.

- Index 0: Thank you!
 - Display Condition: Player holds item
- Index 1: Hey, there!
- Index 2: Do you guys have Mac&Cheese?
 - Response 1: Yes
 - Move to Index 4

- Response 2: No
 - Move to Index 3
- Index 3: Okay, then Can I just get fries?
 - Response 1: Got it.
 - Ends dialogue
 - Response 2: Sorry, can you come again?
 - Move to Index 3
- Index 4: It's not on the menu. You should learn more.
